DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed 7/09/2007 have been fully considered but they are not persuasive. Bernet discloses a matrix of switches (see figure 1) and timing operations (see figures 4-7). Therefore, the examiner finds the amendment to the claims ineffective to overcome the prior art and further finds the applicant's arguments unpersuasive..

Claim Objections

2. Claims 1-4, 6, 8, 10-13, 15 and 17 are objected to because of the following informalities: it is unclear what applicant means by "timing/delay". Does this mean timing "and" delay or timing "or" delay or does it mean something else? Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 23 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 23 and 24, the phrase "tables 6 to 11" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed or those encompassed, thereby rendering the scope of the claim(s) unascertainable. It is unclear what the applicant is attempting to claim in claims 23 and 24.

Drawings

5. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the tables 6 to 10 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-4, 6, 8, 10-13, 15, 17, 23 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Bernet.

Bernet discloses a matrix converter (fig. 1) having current commutation circuitry with bi-directional switches (Cr11, Cr21, Cr23 etc.) arranged in a configuration to begin initiation of one switch before deactivation of another switch wherein the current commutation interval is minimized and is considered to approach zero. And, a first switch and a second switch whereby, in a first mode in use, the first switch is activated and the second switch is not activated, and the current commutation circuitry means is operable to activate the second switch means before the first switch means is deactivated (e.g. fig. 5-7).

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2838

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
